Program Analyst versed in ongoing program evaluations and eager for new professional challenges. Highly effective at reviewing and validating scripts, anxious to launch my career in web development while achieving company goals.

EXPERIENCE

Cognizant Technology Services

Jul 2020 -Present

Program Analyst

Project Name: PAMO E-DOCS

Role: Performance Test Engineer

Tools: Microfocus Loadrunner, ALM Performance Center

Overview: Due to changes in the Existing model, Performance testing is done to access the performance of the document search and retrieval process.

Responsibilities:

- Identified the critical business flows for performance testing online and prepared traversal flow documents for those identified scenarios.
- Prepared test scripts and test executions.
- Calculated workload modeling.
- Executed multiple smoke and load tests.
- Analyzed the test results with baseline test results.

Project Name: PRICING PRACTICE

Role: Performance Test Engineer

Tools: Microfocus Loadrunner, ALM Performance Center

Overview: Due to the changes made in the existing rating models and tables, Premium Comparison Testing and Performance Online testing are mainly focused in this project. By measuring the E2E performance with various applications like UIS Telesales, Digital, and Aggregators.

Responsibilities:

- Identify the critical business flows for a performance testing online and prepared traversal flow documents for those identified scenarios.
- Provided the project team with desired test outputs for which all the new rating changes are validated.
- Designed critical business test scenarios as suggested by the project team and performed Smoke, Load, and Endurance test executions.
